

**STABLE
DYNAMICS**

Complex Engineering. Directly Delivered.

We Are Stable Dynamics

Stable Dynamics is a UK based engineering consultancy founded by industry experts.

Defined work packages from experienced engineers, with clear scope and no unnecessary layers.

How We Work

Work Package Delivery

Defined scope. Agreed outputs.
Direct accountability.

Embedded Engineering Support

Experienced specialists,
integrated where your team
needs them.

Selected Experience

AREA DEFENCE SYSTEM

Delivered technical and software requirements specifications, supported by analysis and documentation, for a new multi-national area defence system's test equipment.

LASER DEFENCE SYSTEM

Provided systems engineering support, including electromagnetic compatibility and UKCA marking, for a UK ship-based laser defence system.

Our Expertise

Our engineers are experienced across a multitude of domains and engineering applications.

Aircraft

Spacecraft

Submarines

Surface Vessels

UAVs and Drones

Land Vehicles

Our Capabilities

Systems Engineering

Requirements, architecture, quality assurance and traceability.

Integration & Test

Test plans, verification and validation.

Modelling & Simulation

Digital twins, trade studies and test environments.

Software Engineering

Embedded, real-time and application development.

Design & System Architecture

Decomposition and interface control.

Project Delivery

Planning, process and programme support.

Direct expertise. Clear scope.
No unnecessary layers.

Let's Get Your Project Moving.
